

Figure D.1: Effects of Authoritarianism on Political Conservatism
Given Varying Experience of Normative Threat

Source: Table D.3, column 4.

Figure D.2: Relationship Between Authoritarianism and Political Conservatism Given Varying Experience of Normative Threat

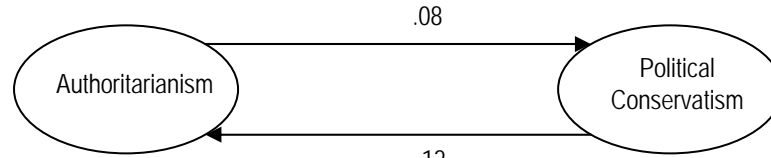

Figure D.2.1: Under normal conditions

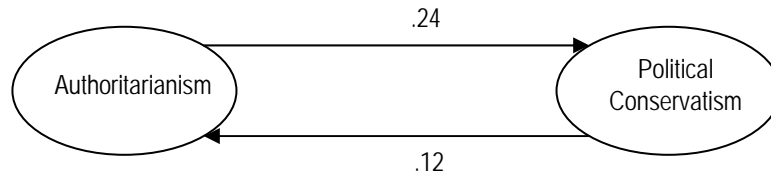

Figure D.2.2: If high variance in public opinion

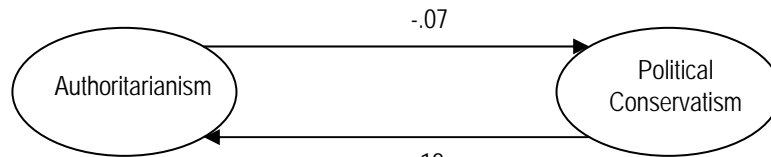

Figure D.2.3: If low variance in public opinion

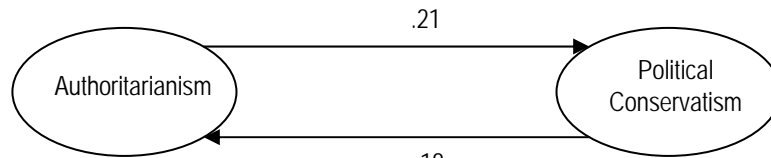

Figure D.2.4: If little confidence in institutions

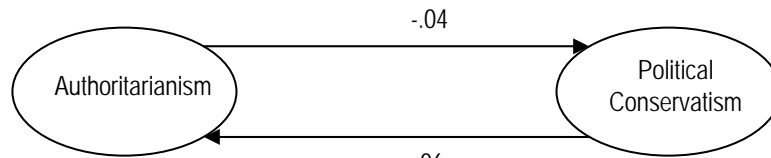

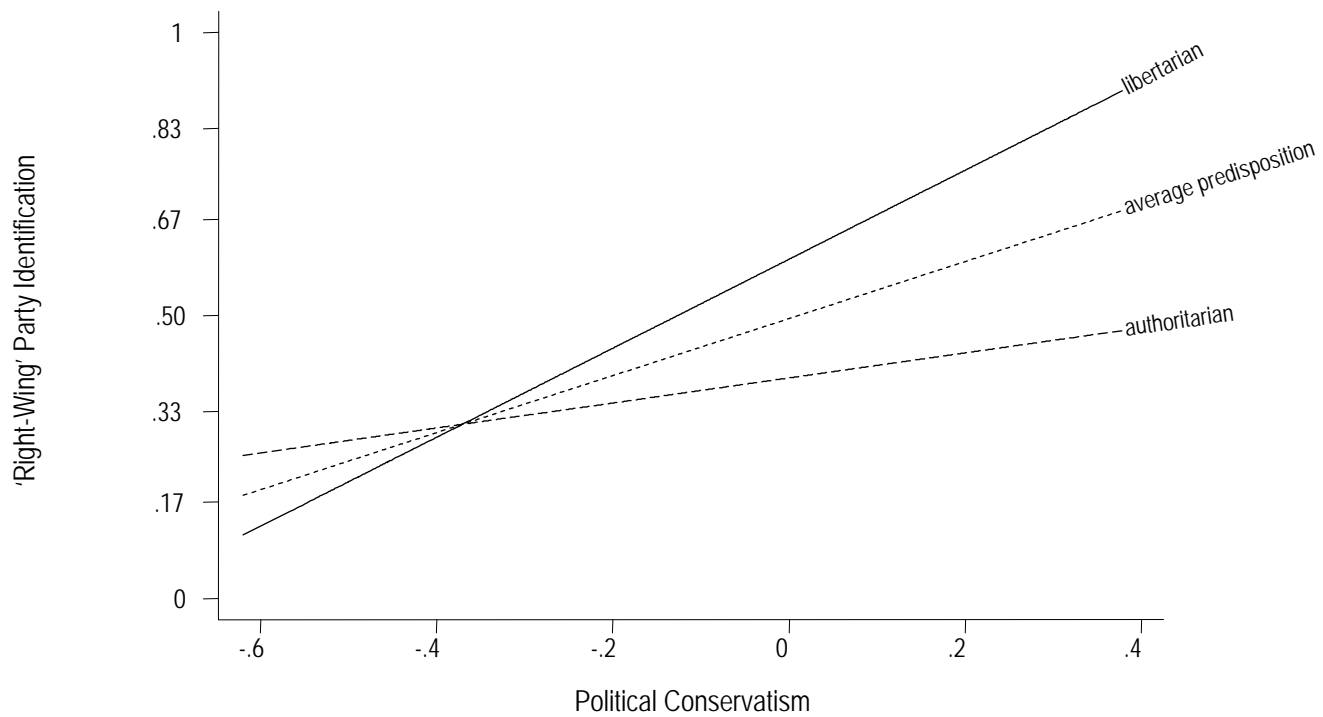

Figure D.2.5: If great confidence in institutions

Note: Path entries are conditional coefficients calculated from unstandardized 2SLS regression coefficients in Tables D.2 and D.3, column 4. All paths significant at $p < .10$ (one-tailed tests applied as appropriate). Source: *GSS72-00*, Whites only; N=6930 (authoritarianism), N=22974 (political conservatism).

Figure D.3: Effects of Political Conservatism on 'Right-Wing' Party Identification Given Varying Authoritarianism

Source: Table D.4, column 2.
